These huge stack bins are ideal for heavy-duty, extra deep shelving and are available in a variety of widths and heights. Heavy-duty front, back and side grips allow for easy handling. Optional clear styrene plastic window increases bin capacity and provides a quick view of the bin contents. Optional dividers maximize flexibility and keep contents organized. **Conductive Ultra Stack Bins & Dividers**

Protect your electronic components from typical electromagnetic interference (EMI), electrostatic or induced fields with these conductive polypropylene bins. The conductive material provides a barrier which these fields cannot penetrate and prevents the build-up of an electrostatic charge. Bins are permanently conductive and are unaffected by washing with normal cleaners. Molded from a carbon filled copolymer polypropylene material with an electrostatic decay rate at less than 0.1 second that meets conductivity standards as tested with ASTM-D257 methods. Its surface resistivity is less than 10<sup>9</sup> Ohms-per square. Easy access to stored items with hopper front bin and label holder provides fast identification. Reinforced side walls and wide ledge allow high stacking on benches or shelving. Be sure all bins are properly grounded according to your use.

## SOLID SHELVING - NO SPILL SURFACE

The solid steel design of these shelves is ideal for storage of small parts that might normally fall through wire shelves. Dual layer construction with double hemmed perimeter and marine edge ensures maximum strength while retaining spillage and excellent corrosion resistance.

All welded solid shelves are constructed of 18 gauge galvanized steel or 304 stainless steel.

By using various accessories, hundreds of shelving configurations become possible.

**18 GAUGE GALVANIZED**

**Galvanized** - is known as a hot-dipping process in which the steel is dipped in molten zinc. This extra layer adds corrosion resistance to the finalized product. Recommended to be used in any application in a dry storage environment. 1-year limited warranty.

**304 STAINLESS STEEL**

**Stainless Steel** - 304 Stainless with an electro-polish finish represents the highest industry standard in the prevention of corrosion. This finish is highly effective for corrosive, high humidity or clean room environments. Lifetime warranty for 304 stainless steel electro-polish finish.

**UNITS CAN BE LOADED/UNLOADED EASILY FROM ALL SIDES.**

# MAXIMUM EFFICIENCY

**AVAILABLE FINISHES**

- ♦ GREEN EPOXY P
- ♦ GRAY EPOXY GY

**NEW**  
**GRAY EPOXY FINISH**

**Note:** Max capacity varies based on system configuration. Wall track has a maximum capacity of up to 250 lbs. when mounted to a wall with wood studs or plywood. Wall track and upright configuration has a maximum configuration of up to 400 lbs. Capacity is calculated based on system mounted to wood studs or plywood.

## Store Grid Mount System

A versatile storage, utility, and display system suited to maximize efficiencies of underutilized spaces and empty walls. Store Grid is an easy to use system that integrates wall tracks, grids, wall shelving, and accessories in custom configurations and lengths. The use of the system around and above equipment will keep these areas cleaner and more organized. Store Grid enables the flexibility to add wall shelving and wall mounted task stations to any space for ease of accessibility and functionality. The durability of the 15 year warranty antimicrobial epoxy and robust design of the system protects against product degradation and ensures easy installation and maintenance.

**Finishes:** Proform Green and Gray Epoxy

- Antimicrobial additive protects the epoxy from bacteria, mold, and mildew that causes stains, odors, and product degradation.
- Keep small wares, utilities, inventory, tools, containers, utensils, and supplies off of the work surface and organized for fast, easy access. The work area remains clean and free from clutter to increase efficiencies.
- Grids attach to the uprights and enable the customizable configurations of accessories - bulk storage shelves, small supply shelves, baskets, hooks, drying rack accessories, utensil holders, bins, small utility racks, and a variety of holders.
- Easy installation and assembly. Mount the wall track and configure a customized work space using uprights, grids, shelves, and accessories.

**IDEAL FOR MAXIMIZING EFFICIENCY IN ANY PREPARATION, STORAGE OR WORK SPACE**

## TO ORDER:

1. Select size of Store Grid wall tracks depending on the space you have
2. Select size and quantity of uprights
3. Select number of shelves and cantilevers (two per shelf)
4. Select grid and accessories

## Product Notes

When configuring task stations with uprights, select shelves and grids of the same length. Longer grids may be used, although must not overhang the upright by more than 6" on either side. Grids may be mounted behind shelves. However, shelf support and grid cannot use the same slots on the upright. Maximum usable wall track mounting space is the track length minus 2" (stop fasteners are installed at each end of a run of wall track and occupy around 1" of track space on each end)

Shelves, shelf brackets, grids, and accessories may be removed for in-depth cleaning of walls. Wall tracks and uprights can be wiped clean. **Note:** Do not use abrasive chemicals or materials since these may damage the protective coating. Clean with mild detergents and damp cloths.

## Recommendations

**Wash Stations:** use shelves, baskets, drying racks and hooks for proper air drying of items used in food preparation.

**Prep Stations:** use shelves, baskets, bins, hooks, spice rack, and glove box holder for a neater work space.

**Polymer Dunnage Racks**

Our Dunnage Racks are as portable as they are versatile. Made from lightweight, heavy-duty high density polyethylene, these are the perfect match for wet or chemically intense manufacturing environments. A simple snap together design makes it a breeze to raise finished goods and raw materials off the ground and away from moisture, dirt and traffic. When it comes to cleanup time, just sweep underneath! We offer the largest commercially available sizes in a high-capacity, low-cost dunnage solution that lets you reset and move workstations as often as you see fit. Plus, the grid-top design simplifies working with fluids and bagged goods because any spilled items will flow through the surface to the floor below.

**Expandable EZ Lock Platform Rack & Pallet**

Quantum's EZ Lock platform and pallet allows you to customize your storage space in seconds. Its patented interlocking design allows true flexibility in building the exact size pallet or platform you need. Using 12" x 40" footprints, each unit locks together making this an all-purpose storage, moving, and shipping solution. Manufactured of recycled high density polyethylene, the vented deck is freezer safe and chemical resistant. Its one piece body design and structure allows for a 4 way forklift and hand truck entry, and it meets GMA industry standards. Enhances any 5S Lean initiative. Withstands temperatures from -30°F – 200°F and offers up to 2,500 lb. load capacity when connected. Once built, the structure will maintain its dimensions with no sagging or stretching. Plastic will not absorb any liquids or chemicals and is resistant to insect infestation. Perfect for use in hospitals, pharmacies, clean rooms, food and beverage areas, manufacturing environments, and supermarket and grocery store back rooms.
